

# Task 3 | Retraction-associated FASTQ data support source-level audit, not claim validation

A

## Retraction-associated public FASTQ case

Used as a boundary-stress audit,  
not as evidence for the retracted claim.

### Publication

Genes Immunity  
PMID 39533019

### Retraction note

Genes Immunity  
PMID 41927935

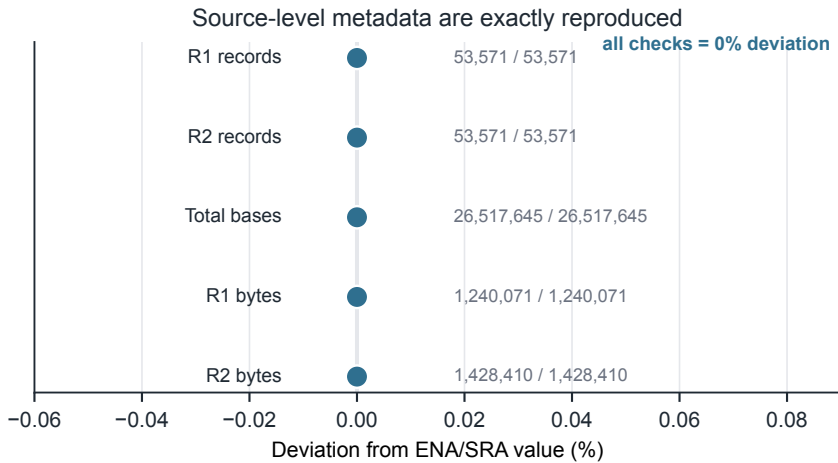

### Public record

SRP508771  
PRJNA1111407  
SRR29088443

### Sequencing file

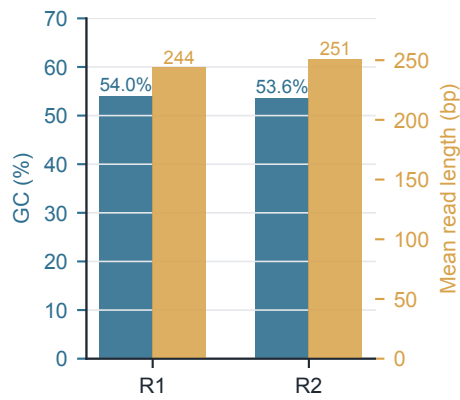

Paired FASTQ  
Escherichia sp.

B

C

## Derived FASTQ quality metrics

D

## Audit interpretation

- FASTQ format**  
pass
- Paired-end structure**  
pass
- Read/base/file metadata**  
match public record
- QC report generation**  
FastQC + MultiQC + seqkit
- Biological conclusion**  
not claimed

Boundary-stress role:  
audit source-data reproducibility  
from a problematic literature record.
